

MILLED GRIND 3

FEATURE	BENEFIT
RAW FACE TECHNOLOGY	Omitting plating from the face and grooves allows for more precise geometry, optimizing spin and feel.
RAISED MICRO-RIBS	Raised Micro-Ribs are positioned between full grooves for added texture on the face. They are designed to increase spin and improve performance on shots around the green.
MILLED GRIND	Milled Grind soles ensure precision where it matters most. The milling process maximizes consistency, maintaining tolerance levels difficult for a human to repeat.
ZTP RAW GROOVE DESIGN	Sharper, deeper, narrower grooves, with radii engineered for more greenside spin and optimal spin in wet conditions.
THICK THIN	Mass placement for enhanced feel while optimizing CG location for precise flight.
TWO FINISHES	Satin RAW Chrome and Satin RAW Black.

CLUB	LOFT	LENGTH	BOUNCE	LIE	HAND	SWINGWEIGHT	MATERIAL	FINISH
STANDARD BOUNCE	46°	35.75"	9°	64°	RH/LH	D3	8620 Carbon Steel	CHROME
