

Qi10 MAX DRIVER

FEATURES AND BENEFITS

TAYLORMADE SPEED WITH A NEW LEVEL OF FORGIVENESS

- Unprecedented 10K MOI. This driver has the highest combined inertia (MOI) in TaylorMade history at 10,000 g/cm. This amazing feat of engineering will provide an unprecedented level of forgiveness in a TaylorMade driver.
- Maximize straight distance. Using strategic mass placement, this driver is engineered to provide the golfer with the ability to more easily square up the head at impact for straighter drives.
- Max address size provides additional head size to push mass even farther towards the perimeter of the head, creating additional MOI.

BETTER ENERGY TRANSFER

- The re-engineered 60X Carbon Twist Face is significantly lighter than traditional titanium faces and creates a more efficient energy transfer.
- New supporting structure promotes faster ball speeds while also improving durability.
- Designed for improved preservation of ball speed on off-center shots.

NEW INFINITY CARBON CROWN W/ ENHANCED ALIGNMENT

- The new Infinity Carbon Crown covers 97% of the total crown area, freeing up more mass for better weight distribution and forgiveness.
- Provides a clean address view with enhanced alignment thanks to the high contrast topline embedded in the 60-Layer Carbon Twist Face.

MAXIMUM ADDRESS SHAPE

- The new oversized address shape provides an attractive and extremely confidence-inspiring look for every level of golfer.

PROVEN TAYLORMADE TECHNOLOGIES

- Adjust loft by using the included 4° loft sleeve (+/-2°).
- Protect ball speed with the Thru-Slot Speed Pocket, designed to optimize ball speed on low face hits.
- A clean and powerful sound is a cornerstone of TaylorMade driver performance.
- Twist Face uses corrective face angles designed to overcome inherent golfer tendencies on mis-hits and to produce straighter shots.

FEATURES AND BENEFITS

EXTREME FORGIVENESS & PLAYABILITY

The Women's Qi10 Max lineup is engineered for extreme forgiveness and playability. Each product is designed to maximize inertia and paired with specific components to deliver made-for-you performance and create more stability at impact. These ultra-high MOI constructions boosts confidence and playability across all skill levels, helping golfers make the most of every swing. Players looking for advanced personalization can choose from a variety of custom options, including shafts, grips and more.
