M6™ DRIVER

TaylorMade®

SPEED INJECTED FOR MAXIMUM FORGIVENESS

> The Speed Injection technology + Twist Face delivers a hot, yet accurate performance package in the new M6 driver. When you combine that with added clubhead speed through advanced aerodynamics, the result is a complete driver that delivers on all fronts."
>
> Brian Bazzel | Vice President Product Creation

SPEED INJECTED™
- Every head is individually speed tested and injected with tuning resin to optimize COR across the entire face
- The Speed Injection process is designed to maximize ball speed and distance in the M6 driver, achieving performance at or near the legal limit

TWIST FACE™
- Revolutionary new face curvature with a corrective face angle on off center hits, engineered to reduce side spin and deliver straighter shots
- Twist Face provides more loft in the high toe and less loft in the low-heel to produce more consistent spin where golfers commonly mis-hit

AERODYNAMIC CARBON SOLE DESIGN WITH "INERTIA GENERATOR"
- Sleek, aerodynamic shaping designed to provide increased clubhead speed for more distance
- Inertia Generator stores 46g of weight low and back for maximum forgiveness
- 54% more carbon than M4 allows for more more weight to be housed within the "Inertia Generator"

HAMMERHEAD 2.0
- The new, more flexible Hammerhead slot works in conjunction with Speed Injected Twist Face to produce a larger sweet spot and preserve ball speed on off-center strikes
