

# MILLED GRIND 4

FEATURE	BENEFIT
<b>SPIN TREAD GROOVES</b>	Deep laser etching between the grooves provides a channel for the water to escape upon impact, maintaining spin in wet conditions.
<b>INCREASED FLANGE THICKNESS</b>	This design offers improved sound and feel on shots struck across the face.
<b>RAW FACE</b>	The raw surface and toe area works in conjunction with the new Spin Tread Grooves to provide the best spin properties in wet conditions.
<b>IMPROVED TOUR INSPIRED SHAPING</b>	The reshaped top line, leading edge and hosel blend to create a smoother and fuller look for improved shot making.
<b>LIGHTER WEIGHT TOUR ISSUE SHAFT</b>	A light True Temper Tour Issue 115g shaft helps generate more feel.
<b>MACHINED SOLE</b>	A fully machined sole ensures the exact grind and bounce geometry every time.
